Career Summary

IT Professional with 3+ years as a React.js developer, starting from January 2022, with a strong background in front-end architectures. Proficient in collaborating with back-end teams to integrate user-facing elements, I excel at identifying and resolving performance and scalability issues. My expertise includes optimizing React applications for enhanced performance, ensuring a seamless user experience across devices. I stay updated with emerging technologies like Redux and Next.js, with practical experience in managing complex state and building server-rendered React applications.
